

Software Update ADS2281 Mitsubishi Code D753494AD

August 2025

Widest coverage for Mitsubishi

Advanced Diagnostics is pleased to announce an update to the ADS2281 Mitsubishi software to extend key programming to Eclipse Cross models fitted with a secure gateway.

Unlock OEM Keys

The ADS2281 software can now also unlock OEM keys for a wide range of Mitsubishi and related vehicles.

No working key needed

The software programmes proximity and bladed keys for a wide range of Mitsubishi and related models even in an all keys lost situation. All existing keys and remotes will be erased before programming new ones.

Repair a broken ECU link

For most of the Mitsubishi applications the software can also repair a broken inter-ECU link, avoiding a potentially expensive dealer intervention.

What else is needed?

Smart Pro

Smart Aerial+
(if no working key is available)

OFFER DETAILS

| | |
|------------------------|--------------------------------|
| Cable | ADC2000 / ADC2013 |
| Smart Aerial+ required | If no working key is available |
| Software category | B |
